I. Background

“UIA-HYP Cup International Student Competition in Architectural Design” was initiated in 2012. It is internationally sponsored by the Union Internationale des Architectes (UIA), organized by the School of Architecture, Tianjin University and Urban Environment Design (UED) Magazine. Shanghai HYP-ARCH Architectural Design Consultant Co. Ltd. is the Exclusive Naming Sponsor. It is an annual architectural competition which has been successfully held for 13 editions. Each year, the UIA-HYP Cup is chaired by an internationally renowned architectural master, and the jury panel is selected from among the world's most outstanding architects and deans from schools of architecture. To boost the architectural education which mainly focuses on basic skill training in its conventional and progressive system, UIA-HYP Cup International Student Competition takes the role as an external platform for student to embrace a brand-new thinking approach in order to improve their comprehensive problem-solving skill, meanwhile it is also some kind of headhunter for discovering emerging elite architects.

II. Content

Topic: Nooks and Crannies: Untapped spaces, unlimited possibilities

Communities are full of untapped spaces—a small patch of land, a stretch of wall, or other overlooked nooks and crannies. Tucked away in obscure corners or hiding in plain sight, these spaces, appearing unclaimed, often exist at the blurred edges of ownership. How might we uncover, utilize, and activate them to unlock their unlimited possibilities?

This theme advocates for individual observation over trendy topics, encouraging participants to ground themselves in reality, sharpen their perception, and explore their surroundings. It challenges them to identify problems, map resources, clarify the relationships and interests of different parties, and grasp the fundamental principles of how society operates, while prioritizing practicality and rejecting abstract idealism. Participants are expected to adopt a design-oriented approach: seeking poetic beauty in everyday life, engaging deeply with reality, addressing concrete issues, and ultimately, reshaping the world around them.

Format for presentation:

Three A1 boards. There is no limit to the format of the boards. Make your projects arresting and refreshing.

Plans, sections, elevations and renderings can be used when needed.

A video no longer than 2:00 minutes.

- The video is not allowed to show personally identifiable information.
- Axonometric drawings, plans, sections, and renderings are expected.
- It is recommended to pay attention to the concept of green environmental protection and the utilization of new energy, and encouraged to use new technologies and methods for data collection, analysis, and visual expression.

-
- Cited data on the existing context is strongly encouraged.
 - If AI tools are used to generate drawings and videos, contestants are requested to clearly label them.
 - Your submission must be subtitled in English.
